

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

To the Alumni and other Friends of Hobart College.

The compiler of the present Triennial is fully aware of its many imperfections. It could not be otherwise. For the first time the attempt is made to give in regular sequence the names of the officers of the College since its foundation and to include the names, degrees and honors of the Alumni, Academic and Medical, and also of those who have received honorary degrees, to present as it were a historic summary of all those who have been officially connected with the College since its establishment in 1825. Other Triennials have been issued from time to time; the last in 1876; from which valuable materials have been obtained for the present issue; but they did not aim to give much more than the names of those who have graduated from the Academic department, while those of the Medical department were entirely omitted. The present therefore must be regarded as an earnest rather than a successful effort by the compiler to enlist the interest of all the Alumni in their College, and to preserve materials for future historians of the College which might otherwise be difficult to obtain.

Errors will doubtless be found by those to whom the Catalogue may be addressed. These are almost inseparable from a compilation of this character. Doubtless many could be found and corrected if an opportunity was afforded for a thorough revisal, but severe domestic affliction in the loss of a beloved wife while these materials were about being placed in the hands of the publishers and which will compel his absence for a time, must be his plea for kindly consideration from those who may detect errors in their records.

It is most earnestly hoped that all who know of data not incorporated, which should be within these pages, would kindly furnish them, that due corrections and inser-

tions may be made in future editions. To this end the following facts are desired:

1. Degrees, when received and where.
2. Professorships in Colleges, name of institution and department.
3. Changes of residences and present address.
4. Prominent political or judicial positions in full with dates.
5. Names of deceased Alumni, date of decease, age, and any other facts for the Necrology of deceased Alumni which is published annually in the College Catalogue.

Many thanks are due to Prof. J. H. McDaniels and to Mr. F. P. Nash, LL.B., late Hobart Professor of Latin, for useful suggestions in the preparation of this Catalogue; also to Mr. Wm. F. Humphrey, of the Sophomore class, to whose skill as a practical printer is entirely due its creditable execution.

Copies of this Catalogue will be sent to any who may wish it on application to the President.

R. G. H.
